

#77-0018-Earth
You Are Part of Nature

I, Mother Nature, am with you on this day and in this way, in order for you to understand just a little more about you while you are on earth, and are a part of nature. Yes, **you are part of nature**. Did you recognize that **all of nature has a soul**? No? Well, that would be the truth. You chose as a soul to be a human being at this timing, to learn to change your thoughts along with your vibrational rate. Human you are, but looking at a tree or a fox, or perhaps a leaf on the plant that you have grown yourself, *you will recognize that all are souls on earth, learning about energy flow within themselves and all that is.*

So, today is a different day because you have a different thought within you that is percolating inside of you and wants to come out. Well, just look about you – anything that is manmade is energy in a physical aspect that can be seen. Some aspects are able to be sensed in a lot of different modes, but they are man-made articles to assist you to live. When you look away from the man-made creations, what do you see? Do you see creatures of many sizes, shapes and colours? Do you see trees that are variant from each other, but similar in their structure? Do you see plants that create flowers and if so, what colour do you think was chosen this timing? Do you see creatures that have chosen to assist humans with their dietary requirements, or do you see them as being a hostage only? Everyone's perspective is variant of course, but the one sure aspect, is that **everything in nature has a soul**, just as you do. Well, that might be a surprise to you, but it is a fact. A soul is in a snail or a bear or a crow. A soul is in the fig tree, an apple tree or a pine tree. A soul is in the lion or the bat or the octopus or maybe even in the outskirts like the penguins. A soul in every aspect of nature, just as you are. You chose to be a human being for this lifetime's experience. But other souls have chosen another part of nature. All are for educational reasons of course, but it is all in the energy creations you chose.

So, today, I would be interested in having you understand your connection to nature, with the blessing of the sun, the moon, the oceans of water and the earth in which you stand up or walk or run on this day. Everything is energy of course, but the soul portions are the reason why you have nature and it is not to be controlled or damaged or set about to have them change. *They are here to assist you in learning about your energy connections to all that is while you are on the earth in this lifetime.*

So, that is the concept for today and it is the concept I would really like you to understand. When you pass a tree of interest, allow yourself to recognize the soul that is within it. Just as it will understand you are a human being and are a soul within it. **Everything is energy and everything on earth has life to it.** That is a fact.

Thank you indeed and good day.
