PARCHMENT

I, Mother Nature, am with you on this day and in this mode of communication to address a concern about the earth, the human beings on earth, and the changes that are taking place within the earth and therefore, all who inhabit the earth. Who is being affected the most, do you think? Is it the sky, the earth, or the water? It is a wonderful idea for you to note the answers. Thank you indeed.

That is because you are observing that **everything you have taken for granted is now changing**. The old seems older, the new is a bit fascinating but a repeat from something previously, the rich are getting richer and the poor are becoming a little more poor. The trees are not looking in the best of health, and the creatures are not as noticeable. Of course, the fish are having challenges. People are so in their own world, it is a fact that they are not paying attention to what the earth is letting them know. Parchment is the word of this week. That is to make certain that you recognize that **whatever is written on parchment paper is to be highly regarded and accepted as an important part of your life**. That is a fact.

So, when it is being noted that your personal storyline is written on parchment paper, it means you are important and your story of who you are, how you are, and what you are is important for the earth and all that is happening upon it. **You are playing a starring role** in the movie of the earth and its alterations. You are affecting the changes, whether you have realized it or not. Thank you indeed.

So, when I use the word parchment for you personally on this day, it means you are perfect and need to **recognize your forms of perfect**. What is your story? Do you recognize that you wrote what you wanted to partake in on earth, what you wanted to learn and what emotions you wanted to rid of and how many steps it would take to do so? BUT you also wanted to be on earth in this timing of change. If you look at what you are able to do on a daily basis and what you are interested in on earth and what you would still be interested in learning about that connection, it is time for you to obtain some parchment and **write down all that you know about yourself and your connection to the earth**. The challenge there is noting whether you have contributed to the beauty of the earth and all that resides upon it, or to the bleakness that is quite often noted by destruction of the earth and all it has within it? You want to be on earth at this timing so you could personally shed all of your destructive tendencies and gaze upon the beauty that is possible and the love that you are able to provide to yourself. Your parchment ‘was’ what you wanted to achieve in this lifetime. Your parchment ‘now’ is the beauty of yourself and your desires to learn more about the connection between yourself and the earth.

Thank you indeed and good day.
